

KAWASAKI ZX-10R
EVOLUTION EXHAUST SYSTEM

Akrapovic Evolution systems are designed for riders who demand maximum performance from their motorcycle. Systems are significantly lighter, if compared to the stock exhaust system and feature exceptional production quality, hi-tech materials and of course increased engine performance combined with pure racing sound output and even greater weight savings. The Evolution system is made entirely of our exclusive high grade titanium. Akrapovic Evolution exhaust system is equipped also with an optional carbon fiber muffler bracket to make exhaust as light as possible. System is not street legal and is designed for racing purpose only.

PERFORMANCE

Measurements of the Akrapovic EVOLUTION system on the KAWASAKI ZX-10R (without muffler insert):

Power & Torque: The power increase with the Akrapovic system is substantial, and can be seen from 4000 rpm right to the top of the range. At 13300 rpm we measured 183.7 HP, with a max. power increase of 8.9 HP at 9130 rpm. The system's effect on the torque and power curve is huge and strongest at midrange rpm. The main increase starts at around 5000 rpm and continues right into the over-rev range.
